# *The Team*

## *We being a Catalyst enable you to Think Change.. by:-*

- Conducting the Industry specific researches and then designing the respective solutions.
- Benchmarking our standards & controls to create the maximum effectiveness of our solutions.
- 
- Creating a real time environment & a platform with a distinctive edge to understand your needs and obtain a full understanding of the related business so that a "best in class" solution can be provided..
- Using the efficiency of the consortiums, Panelists & Consultants to obtain specialist skills & implement “**i Pro**” Processes to help you to Fix, Enhance & monitor your performance and the achievement of desired Goals with total quality.
- To obtain & share the knowledge of related best practices, norms & information from companies within and outside India of the respective related industry.
- To provide necessary and all appropriate support and services using technology, education, knowledge and trainings with a clear aim to enable you to implement the Information technology in the most cost efficient and prudent way.

# *Our Products & Services.*

Our clear goal is to meet the current and rising needs of the I T revolution. Our solutions are in both the forms of virtual and physical contact. Our continuous focus is on creating the power processes & applications for the effectiveness of the results and outputs within desired & defined timelines.

The primary mode of delivery of our products is electronic with emphasis on self-learning. Training modules. Our ops is virtual based and majority of solutions are available to the users through this system. In addition to this, we progressively implement the personal contact programs where in training, skill and technology updating programs are conducted..

The company cross-leverage its skills and competencies by developing bespoke electronic learning modules for clients. We have also developed white label courses which are customized and branded for specific customers. We provide “e-learning” modules which makes our clients **self learn** the features and make the best use of it.
